### Employment History

#### **Front-end developer - Ignition, Hatfield Heath**

JUN 2021 – DEC 2024

- Developed responsive, accessible e-learning courses using React, ensuring consistent performance across devices and compliance with web standards.
- Led development and maintenance of the company's in-house React Native app - resolved long-standing bugs, optimised performance, and delivered major new feature releases used by internal teams and clients.
- Developed a suite of reusable React components leveraged across multiple e-learning projects, significantly accelerating development timelines and improving maintainability.
- Consistently delivered pixel-perfect, high-quality learning experiences in close collaboration with designers and content teams – always with careful attention to detail and timely delivery.
- AI ambassador – implemented tools like Synthesia and HeyGen for multilingual video translation, streamlining workflows and reducing production time and costs.
- Provided technical support during live events, including real-time troubleshooting of spreadsheets and our proprietary mobile app - ensured smooth delivery under pressure.
- Contributed to e-commerce infrastructure by helping build and customise a Shopify storefront using Liquid templates and theme modifications.
- Promoted from Junior to Mid-Level Developer in 18 months, based on performance and increased responsibility.

#### **Portfolio projects**

- Life OS – full stack application to manage habits, goals, to-do lists, gym workouts and journals, all in one place. Built with Next.js connected to a Supabase database. Displays charts for progress, streaks and previous achievements.

## Rory Eddleston
